			MAIL DATE 12/27/2007	DELIVERY MODE PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/559,805	<b>Applicant(s)</b> WALTER, HERBERT	
	<b>Examiner</b> Colleen M. Quinn	<b>Art Unit</b> 3634	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 01 October 2007.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 1-5 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-5 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All    b) ☐ Some \*    c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1, the wording "a first lug *continuing*" at the first end and "a second lug *continuing*" at the second end render the claims indefinite since "*continuing*" suggests the lugs are present elsewhere, when that is not the case.

Regarding claim 4, line 3, it appears the applicant actually intends to say --a raised rib on the insert fits in the groove of the adapter-- rather than "a raised rib runs in the groove of the insert". Appropriate correction is required.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mayer (US 3,322,288) in view of Bogar, Jr. (US 4,108,313) as best understood in light of the above rejections. Mayer discloses a device for detachably holding a transverse

rod (1) supported by bracket arms (2a-c), attached to supporting structure (4a-c), the arms having forked shaped connection means (6a-c) comprising an adaptor (28a-c) including an arcuate cutout (shell of 30a-c), transverse to the supporting arm direction and axially to the supported rod (Figure 1), the adaptor including first and second prongs (upward pointing ends of 30a-c and 31b) directed upwards around the cutout; insert jaws (40a'-c' and 40a"-c"), made of a resilient, flexible material (Specification, column 1, line 32), the insert jaws forming a half-shell shape having an opening that extends more than halfway around the transverse rod (Specification, column 1, lines 30-36), the insert jaws having a curved inner face and outer face (Figures 1-7), first widening and then narrowing, supporting the rod in place (Specification, column 1, lines 37-51), one side of the insert jaws being more flexible than the other, moving outward in order to allow for the insertion of the rod, before moving inward again to secure the rod in place (Specification, column 1, lines 40-51, and column 3, lines 14-19), wherein the adaptor comprises a groove (34) into which a rib (45) extends from the insert and wherein the supporting structure comprises a panel wall (front face of 4) capable of being secured to a wall in a building via vertical rails (4) and wherein the supporting arms are provided with a connecting piece (pegs at the ends of 2a-2c, as best seen in Figure 2) which is intended to be detachably fastened to the securing means. Mayer fails to disclose the adaptor to include lugs that fit into apertures on the insert.

However, Bogar, Jr. teaches a hangrod assembly (Figure 1) comprising supporting arms (18), protective inserts (52) and adaptors (46) that comprise upwardly extending prongs having lugs (54) inward of the adaptors and nearest the opposing

prong and insertable into apertures (unnumbered channels in 52) arranged in the circular groove (slit running along outer surface of 52) on the insert providing a secure fit between the protective inset and adaptors for supporting a transverse rod or rod like item (Figure 1)

Therefore, it would have been obvious to one of ordinary skill in the art, to provide the device of Mayer with the lug and aperture relationship taught by Bogar, Jr., in order to provide a more secure and protective insert for a hangrod assembly.

### ***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Colleen M. Quinn whose telephone number is (571)272-6289. The examiner can normally be reached on 8:30AM-5:00PM Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Glessner can be reached on (571)272-6843. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.
